

Question choices is dynamic :

You can add or remove Question choices as you want, range between 1 to 10 choices for a single Question, all stores in the database

All Questions dynamically managed:

you can add unlimited Question, edit or remove or activate.

Opinion Submit is restricted by IP address:

To avoid votes duplicating and prevent fake voters this script uses IP address to identify voters, save their IP's in a separate table.

Jquery AJAX supported:

The voting process sends by AJAX, results displayed immediately, also in the backend you have the ability to add or remove choices without reloading the page by using Jquery.
